

Showcasing The Perfect Curve of Women

Hi, good day to all members of **K-LINK**! In this issue, I will share about the ways to help women show their perfect curve. Having the ideal slim body shape is a dream for all women, but it is not easy to get the perfect body because it requires strong determination and takes long time apart from doing exercising and maintaining a balanced diet. You can create a perfect and slim body curve with a quality body slimming undergarment. How much do you know about slimming undergarment? Let's look at the myth that commonly found by the public on slimming undergarment.

Myth 1: The tighter it is, the more effective it is

If the slimming undergarment is too tight, it will cause a change in the breast shape, affecting the breathing and difficulty in movement, it might also cause skin problems.

Myth 2: The longer we wear, the more effective it is

Slimming Undergarment may not produce too much impact for a short period, but long-term squeezing and tightening will be prone to systemic blood circulation and metabolic symptoms. Experts suggest wearing the slimming undergarment not more than 8 hours a day.

Myth 3: Wearing slimming undergarment equal to weight loss

Slimming Undergarment possesses refraining effect so as to help you control appetite and weight loss. Although it has effect on losing weight, but slimming undergarment is not a clothes to help in weight loss. Weight loss should consist of less eating and more exercise, slimming undergarment is just a supporting product.

Myth 4: Only old people wear slimming undergarment

Women who want to regain their body shape after delivery, or women who do not have perfect figures such as flat breasts, saggy butt, big thighs, also wish to eliminate fat in certain parts should wear slimming undergarment.

Be healthy and look confident

Hence, we would like to recommend the Body Slimming Undergarment to all, it combines 5 main functions in 1: far infrared rays, magnetic waves, negative ions, copper ions and anti-germs fiber, which helps to control and promote blood circulation in the body. Besides helping women maintaining their attractive body figure, it also helps them to keep their body healthy and be confident.

Benefits

- **Far infrared rays** help improve blood circulation and metabolism, burn excess fat and extra calories, thereby shaping up attractive body curves.
- **Magnetic-wave** massage is applied to increase metabolism rate, improve blood circulation and regulate autonomic nervous system to have a better and healthy body
- **Negative ions** have excellent antibacterial sterilization function
- **Copper ions** help to get rid of odour and unpleasant smell
- **Anti-germs fiber** helps to prevent bacteria growth. Its high elastic material provides the best comfort and anti-roll up function
